WALL STREET NEWS

Languor Disappears in Stock Exchange Session.

tion to turn the plants of the American Sheet Iron and Tin Plate Company into an open shop will be successfully carried out with little if any difficulty.

Nonunon Plants. Most of the plants involved are nonunion anyway, and it was to-day ascertained that of the remaining union mer nearly half were in favor of accepting the proposition of their employers. The mills of the company are not running op full tims and it is estimated that per cent of their old workmen are ill unemployed.

Moreover, the stand taken by the steel orporation in the matter is indorsed by hat of the other large independent proucing companies. While, therefore, the men concerned may not make up their minds immediately to go to work under the new scheme, there is every reason to believe a strike of employes, even it a strike occurs at all, will be of brief duration. There were rumors that the resumption of the advance in Steel com-mon stock was caused by enlarged estimates, heard in a semi-official way, of the net earnings of the corporation in

the quarter ending to-morrow.

A statement of the matter will not be forthcoming until the latter part of next month; but it would not be surprising if these net earnings were found to be rather more than has been heretofore commonly expected, while inasmuch as payments for materials delivered will naturally be heavier in the succeeding quarter than in the present one, the strong probability is that the net earnings in the September quarter will be even larger than those for the June

in it was greater.

The buying began from the outset of the day. The initial price of the common Istocks was at a considerable advance over yesterday's last quotation, and this opening price proved to be almost the lowest of the day. At its close, the stock was but little below its high record made nearly a month ago; and it was noticeable that the net advance of 21points occurred upon a comparatively small volume of dealings.
